HEALTHCARE DATA ANALYTICS EXPERT JOINS MED-VISION BOARD *Scott MacEwen recognized for expertise in analytics, technology*

September 23, 2010 (Tampa, Fla.) - Med-Vision, LLC, a health plan and risk management strategy firm, announces that healthcare consultant Scott MacEwen has been named to the firm's advisory board. In addition to his new role on the Med-Vision advisory board, MacEwen is the president of Analytical Health Solutions, a healthcare consulting company based in Charlotte, N.C.

MacEwen is recognized for his broad expertise in healthcare data analytics, technology, underwriting and operations. As a healthcare consultant, he focuses on reduction in healthcare costs, improved quality of care, and measurements of clinical, financial, and behavioral change in health plan management programs. He delivers risk management programs that accommodate the unique culture of companies while meeting their resources and budgets.

Prior to his current role at Analytical Health Solutions, MacEwen was president and chief operating officer of Kanawha Healthcare Solutions, a national third-party administrator based in Lancaster, S.C. At Kanawha, MacEwen led efforts in the use of predictive modeling that focused on closing gaps in quality of care compliance. The results were significant reductions in allowed costs.

"A decade ago, as COO of Kanawha Healthcare Solutions, Scott MacEwen was utilizing state-of-the-art clinical data metrics improving the lives and medical outcomes for thousands of health plan members, while sequentially saving significant employer dollars," said Dan Ross, president of Med-Vision. "I'm thrilled to have this healthcare industry expert on the Med-Vision team," said Ross.

Earlier in his career, MacEwen worked with United HealthCare where he managed large account sales and was an underwriter for national accounts. He is a graduate of Clarion University in Pennsylvania.

Founded in 2005, Med-Vision delivers health plan risk management and wellness strategies to help employer groups achieve optimal employee health and productivity. Med-Vision specifically caters to the needs of self-funded employer plan sponsors and currently impacts more than 75,000 health plan members. Med-Vision has helped corporations, healthcare facilities, municipalities, and school districts to reduce risk, reverse trends, and decrease healthcare costs while increasing quality of care.
